INSTRUCTION MANUAL

DIMENSIONS

CONTROLS

OUT LED (yellow)
The yellow LED indicates the output status.

READY LED (green)
During functioning, the green LED permanently ON indicates a normal operating condition; fast blinking indicates an output overload condition.

DELAY LED (orange)
The orange LED ON indicates the timing function activation on the digital output.

MARK PUSH-BUTTON
The mark detection procedure is activated by pressing MARK push-button.

BKGD PUSH-BUTTON
The background detection procedure is activated by pressing BKGD push-button.

See the “SETTING” paragraph for setup procedure indications.

INSTALLATION

The sensor can be positioned using threaded M5 holes with max. 6 mm depth.
Do not apply excessive torque when adjusting (max 2.2 Nm).
The operating distance is measured starting from the front surface of the sensor optics.
The reading direction can be changed inverting the cap and lens.
Mark detection on a reflective surface is improved adjusting the beam direction to 5° … 20° from surface axis.

TECHNICAL DATA

Power supply: 10 ... 30 VDC limit values - Class 2 (UL508)
Ripple: 2 Vpp max.
Current consumption (output current excluded): 50 mA max. @ 24 Vcc
Output: 1 PNP output
NPN output
Output current: 100 mA max.
Output saturation voltage: ≤ 2 V
Response time: 33 μs
Switching frequency: 15 kHz
Delay: 0 / 20 ms selectable (default configuration without delay)
Dark/light selection: Automatic
Indicators: OUT LED (yellow) / READY LED (green) / DELAY LED (orange)
Push-buttons: MARK and BKGD push-buttons
DARK/LIGHT selection: Automatic (default configuration LIGHT mode)
Operating temperature: -10 ... 55 °C
Ambient temperature: -20 ... 70 °C
Dielectric strength: 500 VAC 1 min., between electronics and housing
Insulating resistance: >20 MΩ at 500 Vdc, between electronics and housing
Operating distance: 9 mm
Depth of field: 1.3 mm
Minimum spot dimension: 1.5x6 mm @ 9 mm
Emission type: BLUE (465 nm) / GREEN (520 nm) / RED (630 nm) with automatic selection
Ambient light rejection: According to EN 60947-5-2
Vibrations: 0.5 mm amplitude, 10 ... 55 Hz frequency, for each axis (EN60068-2-6)
Shock resistance: 11 ms (30 G) 6 shock for each axis (EN60068-2-27)
Housing material: ABS
Lens material: PMMA
Mechanical protection: IP67
Connections: M12 4-pole connector
Weight: 90 g. max.

SETTING

DETECTION (MARK-BACKGROUND)
- Position mark in front of the sensor light spot and press MARK push-button until the READY LED (green) turns OFF.
The sensor detects the mark alternating the red, green and blue emissions.
Avoid mark movements during this phase.
- Position the background in front of the sensor light spot and press BKGD push-button; the sensor detects the mark alternating the red, green and blue emissions. Avoid background movements during this phase.
The DARK/LIGHT operating mode is automatically selected by the sensor.
Dark mark - light background = Dark mode.
Light mark - dark background = Light mode.

If the READY LED (green) is permanently ON, the detection is successful.
If the LED blinks slowly, the detection has failed due to insufficient contrast.
The sensor returns to the previous setting by pressing one of the two push-buttons.

OUTLED

OUT without DELAY

OUT with DELAY

Delay activation
Press MARK and BKGD push-buttons contemporaneously for 2 sec. until the DELAY LED turns ON.

Delay deactivation
Press MARK and BKGD push-buttons contemporaneously for 2 sec. until the DELAY LED turns OFF.

OUTPUT OVERLOAD
The digital output overload is signalled by the rapid blinking of the READY LED.

DECLARATION OF CONFORMITY
We, Datalogic Automation declare under our sole responsibility that these products are conform to the 2004/108/CE and successive amendments.

Datalogic Automation warrants its products to be free from defects.
Datalogic Automation will repair or replace, free of charge, any product found to be defective during the warranty period of 36 months from the manufacturing date.
This warranty does not cover damage or liability deriving from the improper application of Datalogic Automation products.

Datalogic Automation reserves the right to make modifications and improvements without prior notification.

Datalogic Automation cares for the environment: 100% recycled paper.
