

# HRDP Series Liquid Filter Cartridge

## HRDP Series

Introducing the Cardinal absolute rated Deep Pleat Liquid Filter Cartridge for bag housings in filtration ranges from 1 to 40 microns with 99% removal efficiency.

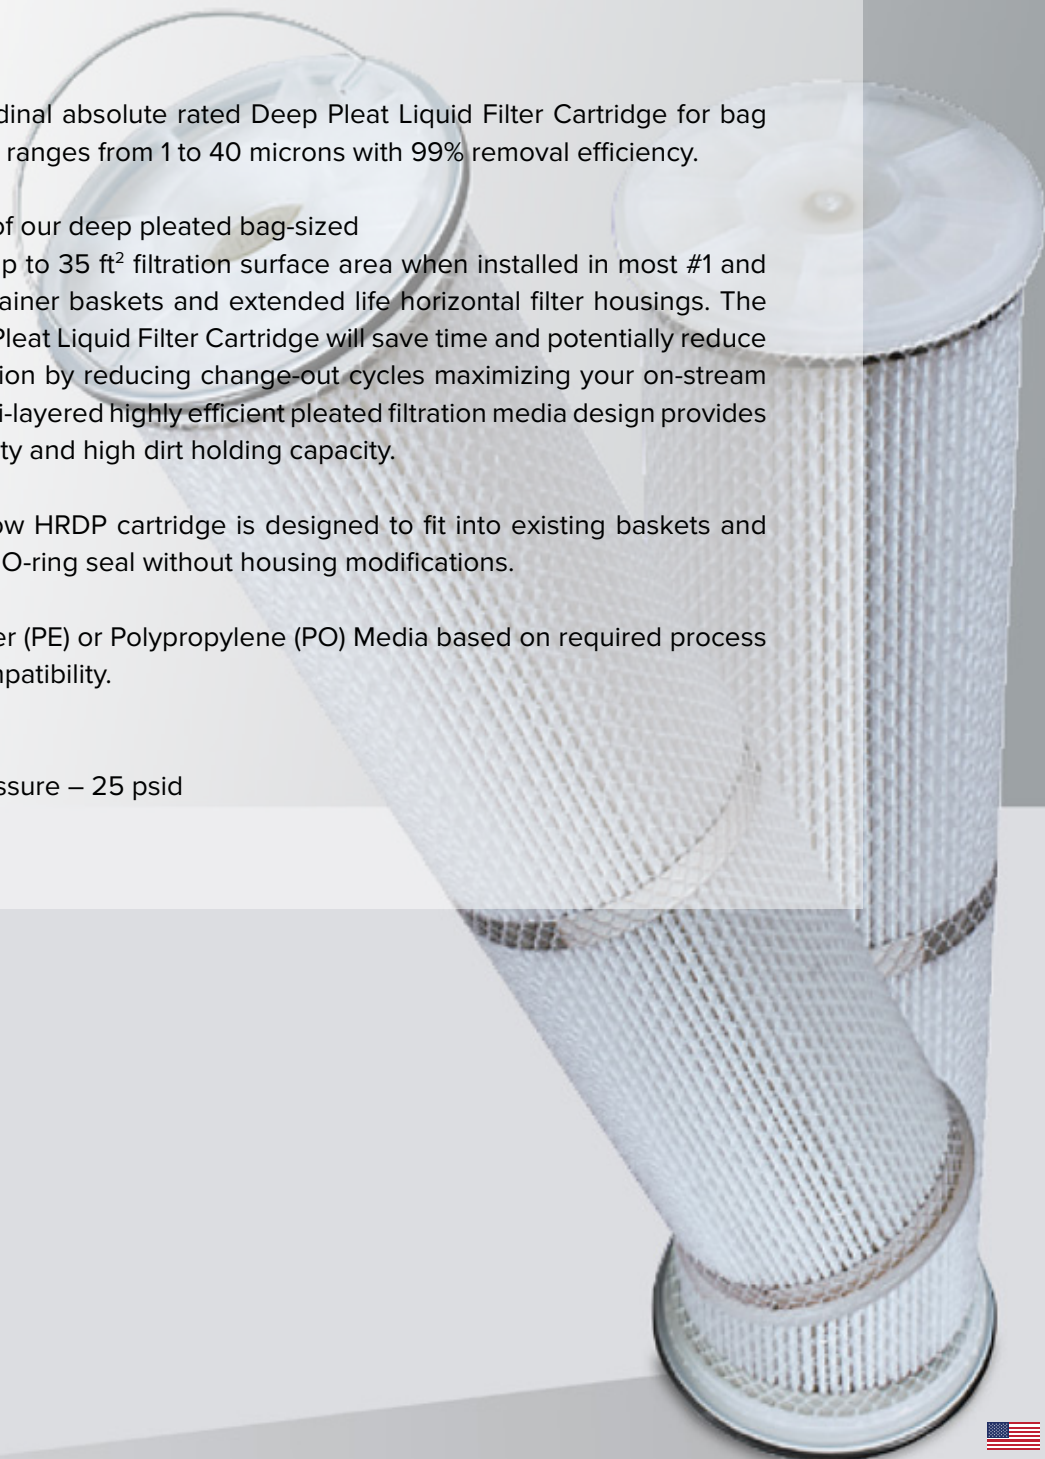

The unique design of our deep pleated bag-sized cartridge provides up to 35 ft<sup>2</sup> filtration surface area when installed in most #1 and #2 standard bag/strainer baskets and extended life horizontal filter housings. The HRDP Series Deep Pleat Liquid Filter Cartridge will save time and potentially reduce overall cost of filtration by reducing change-out cycles maximizing your on-stream service life. Our multi-layered highly efficient pleated filtration media design provides both a graded density and high dirt holding capacity.

The inside-to-out flow HRDP cartridge is designed to fit into existing baskets and includes a captured O-ring seal without housing modifications.

Available in Polyester (PE) or Polypropylene (PO) Media based on required process meets chemical compatibility.

Max Flow – 30 gpm

Max Differential Pressure – 25 psid

 Made in the USA

**Up to 35 Square Feet of Surface Media**  
Standard SC or BC cap style with bail handle.

**Dirt Holding Capacity**

X100 Replacement end cap without bail handle.
