Instrument Pipe Fittings

Features and Technical Data
Parker Instrument Pipe Fittings are precision machined from forgings for elbows, tees and crosses and from bar stock for straight connectors. They are designed to be used for process control and instrumentation connections between pipe sizes and tube sizes.

Features
- Quality engineered for instrumentation applications
- Packaged in sealed, clear plastic shrink wrapped boxes for cleanliness
- All pipe threads are National Pipe Taper (NPT) and exceed the requirements of ANSI B1.20.1 (1968).
- Rolled male threads for extra strength
- Straight bodies machined from applicable ASTM bar stock specifications
- Shapes machined from close grain forgings
- Size ranges from 1/16" through 2" NPT
- Materials – 316 Stainless Steel, Brass and Steel. (Other materials by special order)
- All exposed threads protected to prevent damage

ISO Conversion Pipe Fittings
Parker Instrument Pipe Fittings are also available in Metric/ISO conversion sizes. For a complete listing of sizes and configurations see bulletin number 4260/C.

Nomenclature
Parker Instrument Pipe Fittings part numbers are constructed from symbols that identify the size and style of the fitting and material used.

Example: The part number shown below is for a male hex nipple for 3/8" NPT male pipe and 1/4" NPT male pipe in 316 stainless steel.

### How To Order

Parker Instrument Pipe Fittings are ordered by part number as listed in this catalog.

Size: Pipe thread sizes are designated by the number of sixteenths of an inch. (3/8 NPT pipe=6/16=6)

Thread Type: All pipe threads are National Pipe Taper (NPT) unless otherwise designated.

Straights and Elbows: Call out the largest pipe end first followed by the smaller pipe size. See MHN example on page 5.

Tees and Crosses: For tees that are the same pipe sizes on all ends the size designation is as follows:

6-6-6 FT-B would be a 3/8" NPT Female Tee in brass.

A 1/4" NPT Female Cross in 316 SS would be a 4FX-SS.

If a reducing tee or cross were specified, each size must be in sequence. First size the largest run (1 to 2) and then the branch (3 to 4).

Example: 6-6-6-4 FX-SS

Material: Basic Material Type (B=Brass, SS=316 Stainless Steel, S=Steel)

Special Fittings: If there is any question as to the fitting desired, particularly for special fitting configurations, it is suggested that a customer print be submitted with the fitting request for quote.

Availability: Items priced in current price list 4260 are carried in stock. Price and delivery for non-standard items quoted on request through the quick response department.
