LED Type Wafer Alignment Sensor

HD-T1 SERIES

The use of a safe LED light beam now allows for high precision detection with a resolution of 30 µm 1.181 mil

No safety measures are required at all

As a safe red LED is used as the light source, there is no need for time-consuming safety measures. The protective covers usually required when using laser beams are not needed, and FDA approval is not required in order to use this sensor in the US.

High resolution of 30 µm 1.181 mil

Although the HD-T1 series uses a red LED for its light source, it has the same high level of performance as laser sensors, thus enabling high precision detection.

Easy installation

This unit is equipped with a one-touch connector to connect the sensor head to the controller. The amount of wiring is therefore minimized, resulting in easy maintenance.

Adjustment functions for both span and shift have been incorporated

In addition to the span adjustment function, a convenient shift adjustment function has also been incorporated into the analog output (1 to 5 V). The shift adjustment function allows the analog voltage to be shifted by up to ±0.5 V.

Low current consumption of 70 mA or less

The HD-T1 series has a maximum current consumption of only 70 mA, for both the sensor head and the controller. The current consumption is almost as low as that of photoelectric sensors.
**APPLICATIONS**

Detecting wafer eccentricities or notches

![Image of LED Type Wafer Alignment Sensor HD-T1 SERIES]

**ORDER GUIDE**

Sensor head

<table>
<thead>
<tr>

Emitting element: Red LED (Peak emission wavelength: 650 nm 0.028 mil)

Receiving element: Photodiode

Material: Enclosure: PEI, Front cover: Glass, Mounting base: Aluminum

Cable: Heat-resistant PVC cable, 0.5 m 1.640 ft long, with a connector at the end

Weight: Net weight: 150 g approx.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
2) The value is in a state that the sensor is mounted on the mounting base at the time of factory shipment.

### Pollution degree

3 (Industrial environment)

### Protection

IP40 (IEC)

### Ambient temperature

0 to +40 °C +32 to +104 °F (No dew condensation), Storage: -20 to +70 °C -4 to +158 °F

### Ambient humidity

35 to 85 % RH, Storage: 35 to 85 % RH

### Voltage withstandability

1,000 V AC for one min. between all supply terminals connected together and enclosure

### Insulation resistance

20 MΩ, or more, with 250 V DC megger between all supply terminals connected together and enclosure

### Vibration resistance

10 to 150 Hz frequency, 0.75 mm 0.030 in amplitude in X, Y and Z directions for two hours each

### Shock resistance

490 m/s² acceleration (50 G approx.) in X, Y and Z directions for three times each

### Material

### Cable

0.22 mm² 3-core heat-resistant PVC cable, 0.3 m 0.984 ft long

### Cable extension

Extension up to total 3 m 9.843 ft is possible with 0.3 mm², or more, heat-resistant PVC cable.

### Weight

Net weight: 85 g approx.

**Notes:**
1. Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
2. Resolution refers to the peak to peak distance conversion value of analog output (in the frequency band below 20 MHz).
3. This is the representative example of measurement with a combination of sensor head and controller.

PRECAUTIONS FOR PROPER USE

Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

• Make sure to use the sensor head and the controller together as a set.

Mounting

Sensor head
- Mount the sensor head using 2 pcs. M4 hexagon-socket-head bolts (purchase separately) with a tightening torque of 0.5 N·m or less.
- Do not remove the screws fixing the emitter / receiver and the mounting base. If removed, the output value will change.
- Do not fix with the screws, using the mounting hole on the side of emitter / receiver.

Controller

<In case of using DIN rail>
1. Fit the front part of the mounting section of the unit on the 35 mm 1.378 in width DIN rail, pressing the stopper towards the arrow (the stopper is locked) shown in the right figure.
2. Press down the rear part of the mounting section of the unit on the 35 mm 1.378 in width DIN rail to fix it.
* For removal, insert a flat-bladed screwdriver into the groove of the stopper and pull the handle backwards.

Wiring
- Analog output of controller does not incorporate a short-circuit protection circuit. Do not connect it directly to a power supply or a capacity load.
- Care should be taken that static electricity is not applied to the connector during wiring. It may damage the product.
- Take care that wrong wiring will damage the product.
- Cable extension is possible up to total 3 m 9.843 ft with 0.3 mm², or more, cable. Note that the cable length of the sensor head cannot be changed.
- Do not apply stress such as forced bending and pulling to the cable joint.
- Make sure to use an isolation transformer for the DC power supply. If an autotransformer (single winding transformer) is used, this product or the power supply may get damaged.
- In case a surge is generated in the used power supply, connect a surge absorber to the supply and absorb the surge.

Others
- Do not use during the initial transient time (0.5 sec. approx.) after the power supply is switched on.
- This product outputs according to the amount of LED light received. Optical power varies between the center and the periphery of sensing range, and note that dimensional accuracy cannot be assured.
- Do not allow any water, oil, fingerprints, etc., which may refract light, or dust, dirt, etc., which may block light, to stick to the emitting / receiving surfaces of the sensor head. In case they are present, wipe them with a clean, dust-free soft cloth or lens paper.
- If the sensing object is specular or transparent object, note that accurate measurement may not be possible.

DIMENSIONS (Unit: mm in)

The CAD data in the dimensions can be downloaded from our website.
